EDUCATION

Georgia Institute of Technology, Atlanta, GA
Bachelor of Science in Computational Media

May 2025

RELEVANT TECHNICAL SKILLS

Computing Languages and Skills – Python, C, HTML/CSS, Java, Javascript, Flask, Pandas, SQL, REST APIs, Product Development, Agile/Scrum

Clubs – Art & AI VIP, WREK Radio, Quantum Computing Association, Buzz Film Studios

WORK EXPERIENCE

Good Agriculture, Atlanta, GA — *Software Engineer Intern*

May 2024 – Aug 2024

- Designed and built an Ag-Finance software system from the ground up using Python, improving financial automation and operational efficiency.
- Developed and optimized accounting software components to automate reconciliation, increasing customer capacity and reducing manual workload.
- Integrated Flask webhooks to enable real-time transaction categorization, streamlining financial workflows.

PROJECTS

JoodFM

June 2024 - Present

- Developed a personalized recommendation algorithm to generate daily Spotify playlists based on my music taste.
- Leveraged the Spotify API to fetch recent track data and audio features, enabling dynamic playlist creation.
- Implemented data cleaning, normalization, and cosine similarity to identify tracks aligned with user preferences.

Mixtape

December 2023 – May 2024

- Developed an image-to-music application using various AI models
- Generated image captions using Google ImageText in Google's VertexAI SDK
- Generated continuous music from image input using Meta's MusicGen model
- Integrated code into a Linux environment to be run on a supercluster

Artificial FriendBot

Jan 2023 – May 2023

- Co-led a small (6+) team to create an AI-powered 'FriendBot'
- Used AWS Polly API along with Metahuman to create a realistic human model in Unreal Engine with animated speech using visemes
- Integrated Metahuman with OpenAI API to create conversational functionality
- Delegated sub-tasks such as NLP research, ethical research, and UI to team members
